

# Driving Roundabouts

## Steps for Driving through a Single-Lane Roundabout:

1

### Slow Down

Geometry helps you slow to typical roundabout speeds of about 20-30 mph

2

### Yield at Entry

Look to left, and yield to vehicles already inside the roundabout

3

### Keep Moving

Once in the roundabout, you have the right-of-way

4

### Exit the Roundabout

- Use 1<sup>st</sup> exit to turn right
- Use 2<sup>nd</sup> exit to go straight
- Use 3<sup>rd</sup> exit to turn left
- Use 4<sup>th</sup> exit to make a U-turn
