Quarterly newsletter of the City of North Ridgeville ~ January 2008

## Mayor's Message...

I certainly hope everyone had a wonderful Holiday season and wish you all a happy, healthy and prosperous new year. In anticipation of my 2008 State of the City address to be given on January 24, we're including a pictorial of events and places in North Ridgeville for this issue as we look back on 2007.

I would like to take this opportunity to thank the voters for re-electing me as your Mayor for another term. You have my promise to do all we can towards continuing to make North Ridgeville a thriving community.

Mayor D. David Hillenkamp

Mayor Dave

Sewer Pipe Installation

## Anatomy of a Sewer

Ridge Plaza Ditch

While it's certainly not a subject we often discuss around the kitchen table, a bit of basic knowledge on the subject of sewers can certainly help us all. Backup of storm or sanitary sewers can be devastating to entire neighborhoods, yet they can be caused unintentionally by a single homeowner.

Most areas of the city have two sewer systems, a storm system to drain away rain and groundwater and a sanitary system for everything else. Trouble usually occurs when flow goes into the wrong system. Drain sanitary flow into the storm system and you pollute our creeks and rivers, exposing us all to harmful bacteria, pathogens and toxins.

Drain storm water into the sanitary system and you quickly overload that system and cause backups into your own home, a neighbor's home, or even an entire area of the city. Just one gutter drain connected to the sanitary system can add the equivalent of hundreds of homes to the system.

Neglect of storm ditches and culverts can have the same effect, flooding homes, properties and roadways far upstream from your home. A major problem with the storm water system is debris, such as leaves and yard waste raked or blown into our open ditches.

We're all in this together. The city has doubled its efforts to improve both our storm and sanitary systems, however, we need the assistance of residents to ensure these systems work as designed. Please keep open ditches and culvert openings clear of debris and, if you suspect your home may have an improper connection to the sanitary system, please contact the Service Department. Our knowledgeable employees will be happy to investigate and recommend solutions. Let's work together to keep our sewer systems running smoothly for everyone.

Denny Johnson  
Safety Service Director  
City of North Ridgeville

## Looking Back at 2007

Developer of the North Ridgeville Town Center Tony DiBenedetto, Mayor Gillock and Hank Traweek of All-Type Demolition & Excavating prepare to tear down the old shopping center.
