

CITY OF NORTH RIDGEVILLE

**Daniel Rodriguez, P. E.
City Engineer
Engineering Department**

MEMO

Date: December 5, 2017
To: Developers and Contractors
From: Daniel Rodriguez, P. E.
Subject: Discontinued use of Recycled Portland Cement Concrete 304

As of January 1, 2018, The City of North Ridgeville will no longer accept the use of Recycled Portland Cement Concrete 304 as an aggregate for bedding, backfill, or road base. Any and all aggregates used on City Projects and all Subdivision Developments where right of ways and/or easements will be dedicated to the City of North Ridgeville, must come from an Ohio Department of Transportation approved aggregate supplier. All aggregates must come directly from an approved supplier to the job site. Aggregates cannot be stockpiled offsite then transported in.

The City of North Ridgeville's preferred aggregate material is limestone. Use of any other aggregate material must be approved by the City Engineer in writing before its incorporation into any work.

Should you need any further information, please do not hesitate to contact me.
