| Water Line (New Connection or Repair/Replacement)      |                          |                      | X                           | X                  | X         |          |                   |
| Waterproofing/Dampproofing                             | X                        | X                    | X*                          | X*                 |           |          |                   |
| Windows, Doors (Existing Openings)                     | X                        |                      |                             |                    |           |          |                   |
| Windows, Doors (New or Altered Openings)               | X                        | X                    |                             |                    |           | X        |                   |

## Important Notes:

- \*Engineering permits are required if utilities are connected.
- Manufacturer's installation instructions are required to be on the job site for all installed appliances or equipment.
- Engineering plan review fees are required for new homes at the time of application. Permit fees are due at the time of permit issuance.
- If proposed projects are not zoning compliant, compliant plans will need to be resubmitted or variances must be granted by the Board of Zoning and Building Appeals. Separate BZBA application required.
- Inspections are required for all projects. The contractor and homeowner are responsible for contacting the Building and/or Engineering Divisions a minimum of 24 hours in advance to schedule inspections.
- No Permit Required: patios in the rear yard with no step, kitchen cabinets, carpeting, tile floors, wall treatments, interior doors
